WOMEN

Western Region Union Women

The CEP Western Region Women's committee needs to hear about the positive and negative experiences of women to develop the most effective policies. Women's committees belong at all levels of CEP. They are an integral part of the continued growth of the Union. It is from committees like these that the future leaders of the Union will emerge. And all it takes is time, effort and the recognition that the sisters at your Local are absolutely amazing women, too.

We would like to create opportunities to network, provide support, mentoring, resources, awareness, education and enhance communication.

The newly formed CEP Western Region Women's Committee has a mandate of collecting contact information from all the Sisters of the CEP Western Region in order to increase communication and participation on local, regional and national issues. We are asking that all Union Sisters in every Local of the CEP Western Region to email the following Sisters in your Region with your contact information.

B.C.
